

PROSURF 570

■ Stimulation Additive

> PRODUCT DESCRIPTION

ProSurf 570 is a patented solvent-surfactant stimulation technology designed to provide benefits for improving oil and gas condensate production by

- Lowering interfacial tension
- Reducing surface tension
- Aiding flowback of water-based frac fluids
- Reducing formation damage created by phase trapping

> PACKAGING

ProSurf 570 is available in 330 gallon totes and bulk transport. Other packaging may be available upon request.

> RECOMMENDED APPLICATION

ProSurf 570 may be applied at approximately 1 gal/1000 gal (gpt) in frac fluid. ProSurf 570 is designed to be compatible with nonionic, cationic, anionic, and amphoteric additives. A compatibility test is advised before use.

PROSURF 570

Key features:

- **Non-emulsifying**
- **Improves clean-up**
- **Mitigates water blocking**

Typical Physical Properties

Flash Point (°F/°C)	90 / 32
Freeze Point (°F/°C)	-5 / -20
Charge	Nonionic
Specific Gravity	0.935 - 0.995
Solubility	Water, Acid, Brine
