

CENTIPEDE™

> MORE STAGES, LESS IRON

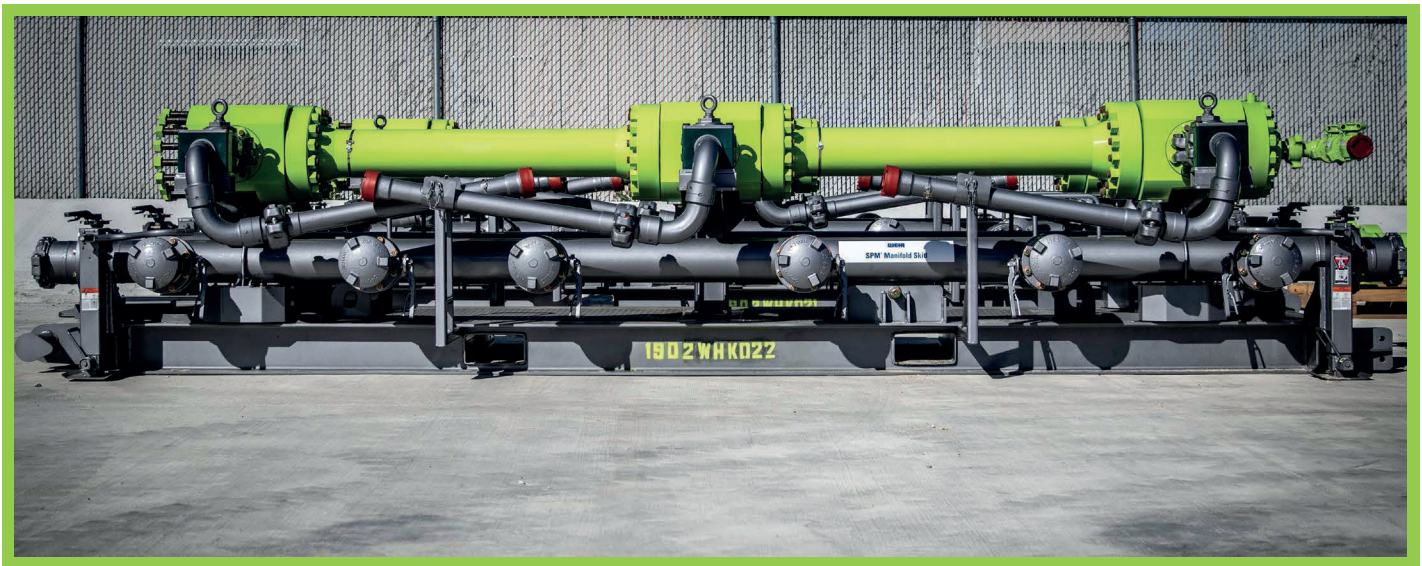

Part of Profrac's hydraulic fracturing service is our frac manifold, Centipede. Centipede's streamlined design provides a reduction in rig-up time, ground iron, and vibration on site. Non-productive time is also greatly reduced, allowing for prime up-time and extended run times which increases fuel usage and cuts emissions.

Features:

- > 7-inch high pressure manifold
- > 15,000 psi, 123 bpm rating
- > Ability to rig in unlimited number of frac pumps
- > Two plug wheel valves
- > One 7-inch check valve
- > Flange for bleed off lines
- > End of skid can be tied directly to monobore system

Features:

- > 50 % reduction in rig-up time
- > 80% less iron connections
- > Eliminates ground iron
- > Fewer leaks and spills
- > Eliminates iron restraints
- > Safer rig-up
- > Virtually eliminates vibration on site
- > Mitigates proppant settling and leak-off from shutdowns
